Professional Summary

Software Engineering student and full-stack developer who builds practical web and mobile systems for healthcare, retail, and community finance. Experienced in designing databases, building PHP/MySQL back ends, and shipping user-friendly interfaces, including a multi-business inventory SaaS used by Tanzanian retailers. Seeking remote internships, freelance projects, and junior developer roles.

Technical Skills

Frontend: HTML, CSS, JavaScript, React, Bootstrap, Tailwind CSS, Responsive Design
Backend: PHP, Laravel, Node.js, REST APIs
Databases: MySQL, PostgreSQL, SQLite, SQL Server, phpMyAdmin
Mobile: Android, Android Studio
Tools: Git, GitHub, VS Code, XAMPP, Laragon
Other: UI/UX Design, Database Design, API Integration

Projects

InvenTZ Inventory System **PHP, MySQL, JavaScript**

- Built a multi-business inventory, sales, and finance platform where each business has its own secure workspace, available in English and Kiswahili.
- Implemented barcode scanning, stock counts, receipts, SMS debt reminders, and financial reports to replace manual record-keeping.

Maternal Health Monitoring System **PHP, MySQL, JavaScript**

- Developed a system for patient registration, antenatal tracking, and reporting to improve health record management.

Kijumbe Management System **PHP, MySQL, JavaScript**

- Built a community finance tool for member records, contribution tracking, and fund distribution, making group savings easier to audit.

Campus Food Delivery App **Android**

- Designed an Android app with user roles, order flow, menu management, and admin control to simplify ordering between students and vendors.

Education

BSc Software Engineering, University of Dodoma **In progress (Year 2)**
Advanced Certificate of Secondary Education (ACSEE) - PCM, Division I
